

# Bearings for **STONE** Industries

# BEARINGS FOR STONE INDUSTRIES

## THE KDM DIFFERENCE

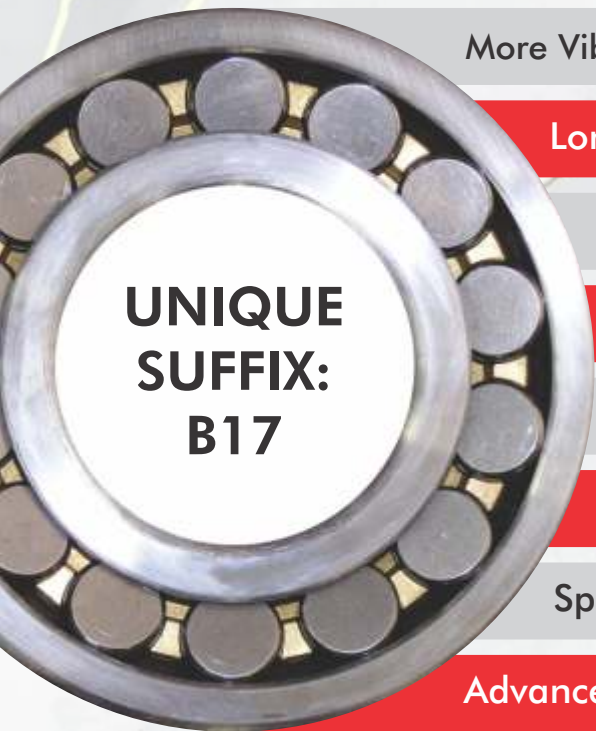

- DESIGN
- DEVELOPMENT
- PRODUCTION
- SERVICES

Bearing used in Marble Cutting Industries are often working in:

- Harsh working conditions.
- Highly erosive environment.
- Frequently contacting cooling water.
- Varying Shock loads.
- Heavy Vibration.

The amount of load induced on the bearing vary with type of Marble or Granite being cut. KDM bearings has taken into account all these factors and have developed a special Spherical Roller bearing for the Marble Cutting Industry:

**UNIQUE  
SUFFIX:  
B17**

More Vibration Resilience

Longer Work Life

Modified Internal Design

High Load Carrying Capacity

New Innovative Designed Rollers

Heavy Duty Steel

Special Heat Treatment

Advanced Forging Provides Compact Internal Structure

Certificate-CE

ISO Certificate

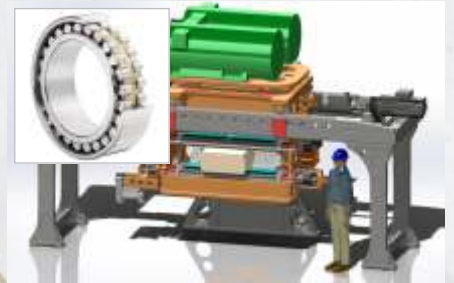

## MAINTENANCE

- Proper fitting and alignment should be taken care at the time of installing the bearing.
- Proper lubrication should be given time to time, Using KDM High Performance Grease.
- Proper protection against foreign sediment particles and water should be done.
